Re: (Patient)
DOB: 00/00/0000

To whom it may concern,
Mr. Vet has been under my care in the hepatology clinic at Audie L. Murphy Veterans Memorial Hospital since May 11, 2011. He was previously followed in other VA facilities and has had extensive work up for right upper quadrant pain, chronic fatigue, nausea, anorexia, and arthralgias which has come back negative for any reversible causes. Mr. Vet reported having these symptoms of chronic fatigue, nausea, arthralgias, and right upper quadrant pain since 2007, which are likely secondary to his diagnosis of chronic hepatitis C. Please do not hesitate to contact me if you have any questions or concerns. Thank you and have a nice day.
Sincerely,

Doctor Name, MD
Hepatology Clinic-ALMVHA
