Subject: Notice of Disagreement with the 1/21/2026 Rating Decision.

**Before the Department of Veterans Appeals**  
**Appellant's Legal Brief**

Appellant, through his appointed representative, now files his Notice of Disagreement with the January 21, 2026, Rating Decision (RD) which failed to render a decision which granted every benefit that could be supported in law while protecting the interests of the Government under §3.103(a) (2026)-to wit:

Entitlement to higher level of SMC than awarded- specifically entitlement to SMC at the intermediate rate between L and M under authority of §3.350(f)(3) for §4.119 DC7541 diabetic nephropathy rated at 60%;

Entitlement to higher level of SMC than awarded- specifically entitlement to SMC at the M rate under authority of §3.350(f)(3) for §4.71a DC 5243 at 40% and DC 5215-5010 at 10%;

Entitlement to higher level of SMC than awarded- specifically entitlement to SMC at the intermediate rate between M and N under authority of

§3.350(f)(3) for §4.119 DC 7913 at 20% and DC 8520 bilateral lower extremity PN at 20% each.

Because appellant is proceeding *pro se* with a VA representative rather than a VA-accredited attorney, he asks for both a sympathetic reading of his informal brief and a liberal construction of his arguments. See **Calma v. Brown**, 9 Vet.App. 11, 15 (1996); **De Perez v. Derwinski**, 2 Vet.App. 85, 86 (1992). In **Andrews v. Nicholson**, 421 F.3d (2005) at 1283, the Court held "Although we have held that the duty to construe a veteran's filings sympathetically does not necessarily apply when a veteran is represented by an attorney, the assistance provided by the DAV aide is not the equivalent of legal representation."

### **The Legal Landscape**

In **Akles v. Derwinski**, 1 Vet.App. 118, 121 (1991), the Court noted VA's policy to consider SMC where applicable). See also **Bradley v. Peake**, 22 Vet. App. 280 (2008) ("Accordingly, any effective date must be based on that point in time when the evidence first supported an award of SMC, which may be well before Mr. Bradley raised the issue of his entitlement thereto. See 38 U.S.C. §§ 5110(a), 1114(s); 38 C.F.R. § 3.400(o) (2008)").

38 CFR §3.350(f) deals with the ratings associated with SMC at the P rate. In particular, §3.350(f)(3) provides for the following:

**(3) Additional independent 50 percent disabilities.** In addition to the statutory rates payable under 38 U.S.C. 1114 (l) through (n) and the intermediate or next higher rate provisions outlined above, additional single permanent disability or combinations of permanent disabilities independently ratable at 50 percent or more will afford entitlement to the next higher intermediate rate or if already entitled to an intermediate rate to the next higher statutory rate under 38 U.S.C. 1114, but not above the (o) rate. In the application of this subparagraph the disability or disabilities independently ratable at 50 percent or more must be separate and distinct and involve different anatomical segments

or bodily systems from the conditions establishing entitlement under 38 U.S.C. 1114 (l) through (n) or the intermediate rate provisions outlined above. The graduated ratings for arrested tuberculosis will not be utilized in this connection, but the permanent residuals of tuberculosis may be utilized.

In **Barry v. McDonough**, WL \_\_\_\_\_ #22-1747 decided May 16, 2024 (F.3d), the Court held there was no stricture in the meaning of the regulation (§3.350(f)(3)) forbidding multiple awards of the "half-step" as long as the disability or disabilities were separate and distinct and involved different anatomical segments or bodily systems from the conditions establishing entitlement under 38 U.S.C. §1114 (l) through (n).

In **Moreira v. Principi**, 3 Vet.App. 522, 524 (1992), the Court held that SMC is available when, "as the result of service-connected disability," a veteran suffers additional hardships above and beyond those contemplated by VA's schedule for rating disabilities. See 38 U.S.C. § 1114(k)-(s). The rate of SMC "varies according to the nature of the veteran's service-connected disabilities."

## **Discussion**

Following the Agency of Original Jurisdiction (AOJ) RD of October 23, 2025, the Appellant timely filed his VAF 20-0995 on November 10, 2025, disagreeing with the decision. Unfortunately, due to the delay in revising the VA Adjudications Manual (M 21-1MR (2025)), the precedence established in **Barry supra** was not applied to the instant claim. **Akles supra**.

For the following reasons, the Appellant avers the proper rate of SMC should be as follows:

Entitlement to higher level of SMC than that awarded in the October 23, 2025, RD- specifically entitlement to SMC at the intermediate rate between L

and M under authority of §3.350(f)(3) for §4.119 DC7541 diabetic nephropathy rated at 60% with effective date of September 22, 2025;

Entitlement to higher level of SMC than awarded in the October 23, 2025, RD - specifically entitlement to SMC at the M rate under authority of §3.350(f)(3) for §4.71a DC 5243 at 40% and DC 5215-5010 at 10% with effective date of September 22, 2025;

Entitlement to higher level of SMC than awarded in the October 23, 2025, RD - specifically entitlement to SMC at the intermediate rate between M and N under authority of §3.350(f)(3) for §4.119 DC 7913 at 20% and DC 8520 bilateral lower extremity PN at 20% each with effective date of September 22, 2025.

Each of three contentions voiced in the instant Appeal above are separate and distinct from the index disease of Ischemic Heart Disease (IHD) upon which the award of SMC at the L rate under §3.350(b)(3) was predicated on in the October 23, 2025, RD.

### **Conclusion and Prayer for Relief**

While the Secretary has notably failed to incorporate the required information demanded by both statute (38 USC§ 5104(b)) and regulation (§3.103(f)), Appellant waives review in the first instance below at the Agency level as this does not involve controversy over how the evidence was weighed. In point of fact, it only involves the new Federal Circuit (CAFC) precedence incorporated in **Barry supra**.

Appellant feels the appeal is in equipoise and asks for the time-honored pro-Veteran canon of statutory construction most recently espoused in **Henderson v. Shinseki**, 562 U.S. 428,441(2011) which held that "We have long applied the canon that provisions for benefits to members of the Armed Services are to be construed in the beneficiaries' favor."

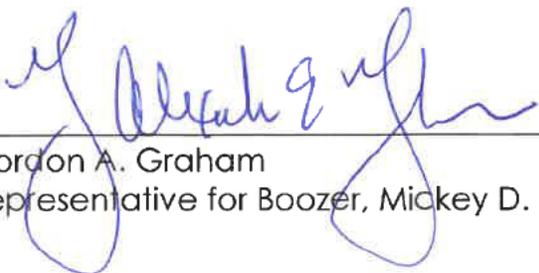

The pro-Veteran canon instructs that provisions providing benefits to veterans should be liberally construed in the veterans' favor, with any interpretative doubt resolved to their benefit. See, e.g., **King v. St. Vincent's Hosp.**, 502 U.S. 215, 220 (1991).

The Supreme Court first articulated this canon in **Boone v. Lightner**, 319 U.S. 561, 575 (1943) to reflect the sound policy that we must "protect those who have been obliged to drop their own affairs to take up the burdens of the nation." This same policy underlies the entire veterans benefit scheme.

See also **Barrett v. Principi**, 363 F.3d 1316, 1320 (Fed. Cir. 2004) ("[T]he veterans benefit system is designed to award entitlements to a special class of citizens, those who risked harm to serve and defend their country. This entire scheme is imbued with special beneficence from a grateful sovereign."

In **Fishgold vs. Sullivan Drydock & Repair Corp.**, 328 U.S. 275, 66 S. Ct. 1105 (1946) the Supreme Court declared that veterans laws are "to be liberally construed for the benefit of those who left private life to serve their country in its hour of great need," and the Court showed us how to do so—"construe the separate provisions of the [law] as parts of an organic whole and give each as liberal a construction for the benefit of the veteran as a harmonious interplay of the separate provisions permits." The slipping stems from two words in an oft cited pro-veteran canon case, **Brown v. Gardner**, 115 S. Ct. 552, 130 (1994): "interpretive doubt."

Respectfully submitted,
